

## ROUND ROBIN NSMTA DOUBLES TIEBREAKER SYSTEM

### NSMTA SUPER SENIOR DOUBLES CHAMPIONSHIPS

In the individual groups of 3 or 4 teams the TB system for who is the second-best team which gets to advance to quarters or semi's is as follows:

1. Head to Head
2. Team who has won the most sets
3. The team with the best winning percentage of games calculated by taking the total number of games won and dividing it by the total games played.
4. Examples: team play 3 matches and plays total of 54 games and won 16 games. Their winning percentage would be 29.6% (16 divided by 54)

Then in comparing the second-best teams of the groups, if all have played the same number of matches the TB is:

1. Team who has won most sets
2. Team with the best winning percentage (above)

Then in comparing the second-best teams if all have not played the same number of matches (some 2 and some 3) the TB is:

1. Team with the best winning percentage
